ABOUT ATTAQUANT CHEMICALS

Attaquant Chemical Pvt. Ltd. is a stalwart in the chemical compound manufacturing and distribution industry. It was founded in 2020 with a vision to create a top-notch chemical company with high quality products and superior service to the customers. We are the manufacturer of sulphuric acid, nitric acid, sodium bisulphate and sodium metabisulphate in India and are currently manufacturing four products in the same domain. Meeting the requirements and demands of approximately 100+ customers across the globe is our paramount objective.

The company has a manufacturing unit at Shirwal Dist. Satara. The company has installed fully equipped laboratory for conducting sophisticated tests for quality control. The company is professionally managed and more than 150 people are employed directly or indirectly. The company has a dedicated marketing team with rich experience in field work and sales promotion.

MISSION

"To make distribute, sell & trade the highest quality chemicals with a continued commitment to meet the market needs & standards while promoting business practices that respect our employees, our customers, our suppliers and the environment."

VISION

Vision is to create satisfied customers with a trend of quality, perfection, and services. Together we can make difference.

WHY CHOOSE US

OUR TEAM is comprised of expert problem solvers strategically positioned around the globe working to minimize issues in order processing. ACPL is armed with hundreds of years of combined experience to assure our customers of the best service possible.

OUR PRODUCTS supply a wide variety of industries to fulfill their needs for chemicals, composites, and plastics. We make every effort to constantly expand our product lines to afford long-term customers the ability to build new business needs that ACPL can service.

OUR BUSINESS is an international, privately owned company, providing cost effective alternatives focused on the needs of small, medium, and fortune five hundred companies.

MANUFACTURING PRODUCT

SULPHURIC ACID(H_2SO_4)

ACPL is the manufacturer of Sulphuric Acid in India with an installed capacity of 50,000 MTPA. ACPL manufactures Sulphuric Acid through an extremely efficient and environment friendly, producing a colourless product of high purity, with no undesirable door or by-product formation. The product meets international quality standards for use in pharmaceuticals. For critical applications in the Industrial sector, ACPL offers Sulphuric Acid conforming to stringent standards. ACPL has a fully automated drumming facility for catering to small consumers and for meeting the

increasing demand from neighboring countries for exports. Our product has been well accepted in various markets such as USA, EU, AFRICA, MIDDLE EAST and FAR EAST.

NITRIC ACID (HNO_3)

ACPL is the manufacturer of Nitric Acid in India with an installed capacity of 40,000 MTPA largest integrated nitric acid plant across South East Asia which conforms with international standards. The company manufactures three grades of nitric acid which include dilute nitric acid (DNA), strong nitric acid (SNA) and concentrated nitric acid (CNA). In addition to these, the company also has the capability of customizing grades to cater to specific requirements of its customers. To serve its customer better and ensure just-in-time delivery.

SODIUM BISULPHATE (NaHSO₄)

ACPL is the one of the leading manufacturers of Sodium bisulfate. With our rich experience in this field, we are engaged in providing our clients to serve high quality and lowest rate of Sodium Bisulfate. Sodium Bisulfate (NaHSO₃) also called as sodium hydrogen sulphite is a chemical compound that can be prepared by bubbling sulphur dioxide in a solution of sodium carbonate. 38 percent of solution is produced by neutralizing sulphur dioxide gas with sodium hydroxide. Sodium Bisulphite in contact with chlorine bleach will release harmful fumes.

Sodium Bisulfate is used in almost all commercial wines, to prevent oxidation and to preserve flavour. It is also used in the analysis of methylation status of cytosine in DNA.

SODIUM METABISULPHATE (Na₂S₂O₅)

We are a renowned manufacturers of Sodium Metabisulfite from a known number of years. This product is formulated using the best quality ingredients that are strictly checked by our team of experts. This product is used to remove osmosis membranes in desalination systems and to remove chloramines from drinking water after treatment. Moreover, we are offering our clients all our products at industry leading prices and in no time constraint.

TRADING PRODUCTS

At ACPL, we are recognized as Sourcing Specialists. We encourage customers to reach out to us directly if a product is not currently listed. Daily, we secure new and difficult to find products. If you are in need of an un-listed product, email sales@attaquantchemicals.com today

ACID

- ACETIC ACID
- ACID SLURRY LABSA- 90 & 96%
- BORIC ACID
- CHROMIC ACID
- CITRIC ACID
- FORMIC ACID
- HYDROCHLORIC ACID-30%-33%
- OXALIC ACID
- PHOSPHORIC ACID
- SULPHAMIC ACID

CARBONATES

- AMMONIUM BICARBONATE
- BARIUM CARBONATE
- CALCIUM CARBONATE
- LITHIUM CARBONATE

CHLORIDE

- ALUMINIUM CHLORIDE
- BARIUM CHLORIDE
- CALCIUMCHLORIDE LUMPS/LIQUID/POWDER
- FERRIC CHLORIDE
- MANGESIUM CHLORIDE
- POLYALUMINIUM CHLORIDE(POWDER/LIQUID)
- SODIUM CHLORIDE
- ZINCCHLORIDE-LIQUID/80-82% ANHYDROUS

NITRATES

- POTASSIUM NITRATE
- SODIUM NITRATE

SULPHATES

- ALUMINUM SULPHATE-FERRIC/NON-FERRIC
- COPPER SULPHATE
- FERROUS SULPHATE
- MAGNESIUM SULPHATE
- MANGANESE SULPHATE
- SODIUM SULPHATE
- SODIUM THIO SULPHATE
- SODIUM TRIPOLYPHOSPHATE
- ZINC SULPHATE

PHOSPHATES

- DI CALCIUM PHOSPHATE
- DIAMMONIUM PHOSPHATE
- DISODIUM PHOSPHATE
- MONOSODIUM PHOSPHATE
- SODIUM HEXAMETAPHOSPHATE
- SODIUM TRI POLYPHOSPHATE
- TRI CALCIUM PHOSPHATE
- TRI SODIUM PHOSPHATE

OTHER CHEMICAL

- ALFA OLIEFIN SULPHONATE(LIQUID/PASTE)
- ALUMINUM HYDROXIDE
- BENTONITE
- BLEACHING POWDER
- BORAX PENTA / DECAHYDRATE
- CAUSTIC POTASH FLAKES
- CAUSTIC SODA FLAKES /LYE 48 %
- DEXTRIN - WHITE / YELLOW (MODIFIED STARCH)
- EDTA - DISODIUM
- FORMALDEHYDE
- GLYCERINE
- HYDRATED LIME POWDER
- HYDROGEN PEROXIDE
- LIQUOR AMMONIA
- POLY ELECTROLYTE
- POTASSIUM CITRATE
- POTASSIUM PERMANGANATE
- SALT (ALL TYPE OF SALT)
- SILICON DEFOAMER
- SODAASH LIGHT
- SODIUM ACETATE POWDER / TRIHYDRATE
- SODIUM DICHROMATE
- SODIUM HYPO CHLORITE
- SODIUM LAURYL ETHER SULPHATE
- SODIUM META SILICATE
- SODIUM NITRITE
- SODIUM PERBORATE
- SODIUM SILICATE
- SODIUM SILICOFLUORIDE
- SULPHUR
- TITANIUM DIOXIDE (ANATASE/ RUTILE)

Our portfolio of products is consistently growing. If there is a product you would like to inquire about specifically please email sales@attaquantchemicals.com to be placed in contact with a member of our sales team.
